Riset Kimia

Volume 14, Number 1, March 2023

We are pleased to inform you the first issue of Volume 14, Jurnal Riset Kimia. Jurnal Riset Kimia (J. Ris. Kim) is a peer-reviewed journal in the field of chemistry and applied chemistry, published by the Department of Chemistry, Faculty of Mathematics and Natural Sciences, Universitas Andalas, West Sumatra, Indonesia. The publishing frequency is two issues per year, in March and September. The journal is dedicated to the following types of manuscripts: first, a research article with the scope (yet not limited to) Chemistry and Applied Chemistry; second, a review article and last, Communication (Based on Editor's Invitation).

In this issue, we featured ten articles authored from nine different provinces in Indonesia. In this issue, material chemistry is the majority of topics, including TiO_2 , carbon black, and Zn(II)-astaxanthin complex compound. Two papers covered a topic in organic chemistry about the isolation and analysis of secondary metabolites of Getih-Getihan Fruit (*Rivina humilis* L.) and "Pucuk Merah" (*Syzygium myrtifolium* Walp.) extract. Another paper discussed optimization of the seaweed hydrolysis catalyzed by HNO_3 using microwave irradiation. One topic in analytical chemistry studies the development of paper based-cafein chemical sensor. Last but not least, one article discussed a topic in applied chemistry to make vegetable fungicide as a growth inhibitor for *Colletotrichum gloeosporioides* in postharvest horticulture from Soursop leaves (*Annona muricata* L.).

The editor in chief appreciates and is deeply grateful to all authors, reviewers, and supporting staff for their dedicated and professional work for the publication of Jurnal Riset Kimia, and special thanks to our future readers. We are looking forward to the submission of high quality manuscript to Jurnal Riset Kimia.
