Preface

It is with great gratitude that I welcome the opportunity to serve again as Editor in Chief of the Jurnal Riset Kimia. In this edition, we present a variety of articles that reflect the latest innovations and developments in the field of chemical research. Each published contribution has gone through a rigorous assessment process, and I hope the results will provide new insights and become an important reference for researchers, academics, and practitioners around the world.

In this edition, we present a compelling collection of research articles that reflect the cutting-edge advancements in material science, medicinal chemistry, and environmental sustainability. The diversity of topics addressed showcases the interdisciplinary nature of modern scientific inquiry, emphasizing the importance of innovation and collaboration in tackling contemporary challenges.

Together, these articles not only advance our understanding of their respective fields but also exemplify the crucial interplay between science and sustainability. As we continue to navigate the complexities of modern research, the contributions of these authors provide hope and direction for future innovations that benefit both society and the environment.

I would like to thank all the authors, reviewers, and editorial team who have contributed to the publication of this edition. This collaborative effort reflects our commitment to improving the quality of research and publications in chemistry. May the Jurnal Riset Kimia continue to be a useful and inspiring platform, encouraging continuous knowledge exchange and innovation within the scientific community.
